

Field Setup Amendments

Tables will be setup according to the FLL Field setup instructions, with the following exceptions:

Balls

Eight blue balls are placed on the indicated spaces along the field border separating the tables in the Nano Quest Challenge.

Space Elevators

Two Nano Quest Space Elevators are used, and are positioned as indicated by the masking tape on the Nano Quest Table border.

Space elevators are configured such that each robot can activate it's East-most elevator without the assistance of the other teams robot (ie: only one release pin is engaged on each elevator).

Satellites

Two Satellites are used, and are positioned as indicated by the masking tape on the Power Table border.

Wind Turbine

The gear that spins the Wind Turbine starts in the open position (ie: robots must engage the gear to get the Turbine to spin).
