

Comp 7006 - Lab #6

Access Control and Security - TCP_Wrappers & xinted

Due Date: October 27, 2009.

Work in groups of **two**.

Objective: To set up TCP-wrapped services.

Your Mission:

You are required to install and set up controlled access to **Telnet** services on your server. You may use **TCP Wrappers** or **xinted** in order to accomplish this.

Constraints:

- Restrict access to the above services to the instructor's workstation only.
- Access to the services will only be allowed between 1330 and 1600 hrs.
- All connection attempts to your services have to be logged.

Requirements:

1. Demonstrate your working servers in the lab.
