

Task 1

```
synchronized (anObject) {  
    try {  
        // Wait for the condition to become true  
        while (!condition)  
            anObject.wait();  
  
        // Do something when condition is true  
    }  
    catch (InterruptedException ex) {  
        ex.printStackTrace();  
    }  
}
```

resume

Task 2

```
synchronized (anObject) {  
    // When condition becomes true  
    anObject.notify(); or anObject.notifyAll();  
    ...  
}
```
