COMP 3711

Lab 8

Nov 17, 19

Exercise

Note:
You must have completed Lab 7 before embarking on this lab., i.e. the tutorials on creating a Data-Driven Test and Functional Test Basic Operations by using IBM Functional Tester.

If you need more time to complete Lab 7, please do so in this lab time prior to commencing the requirement below.

Lab 7 and Lab 8 are done in preparation for your understanding of Software Testing lectures and Assignment 3.

----

1. **In Lab 8, you will have fun to record a test script using Rational Functional Tester for a common application of your choice, other than the tutorial Classic CD applications done in Lab 7.**

2. **Put at least 1 verification point in the script.**

3. **Be prepared to demo your script.**

4. **Save your test script and the test log and submit them in the share-in drive.**
